SUMMARY

Third-year B.Tech Computer Science student specializing in Artificial Intelligence and Machine Learning, with hands-on experience in machine learning, data analysis, and AI application development through internships and academic projects. Interested in building practical AI solutions, improving technical skills, and contributing to real-world projects.

TECHNICAL SKILLS

- Programming Languages: Python, Java (Basics)
- Web Technologies: HTML, CSS, JavaScript
- Machine Learning: Machine Learning, Data Preprocessing
- Libraries & Tools: NumPy, Pandas, Matplotlib, Git, GitHub, VS Code, Eclipse
- AI/ML: NLP, RAG, LLMs, ANN, PCA
- Libraries & Frameworks: Scikit-learn, TensorFlow, OpenCV, Streamlit
- Database: SQLite | Core Competencies: Problem Solving, Analytical Thinking, Communication, Team Collaboration

EXPERIENCE

AI/ML Intern | IStudio | Mar 2026 – Present

- Assisted in the development and testing of AI/ML solutions, supporting machine learning workflows and experimentation.
- Conducted research on AI Agents, LLMs, and RAG systems; analyzed datasets to identify trends and insights.
- Collaborated with mentors and project teams while contributing to AI research and implementation initiatives.

AI/ML Intern | Labmentix | Aug 2025 – Feb 2026

- Applied machine learning and data analysis concepts to analyze datasets and identify customer behavior trends.
- Structured, cleaned, and transformed data while developing visualizations and reports to communicate analytical insights.
- Collaborated on analytical challenges and delivered insights through reporting and analysis.

PROJECTS

SMART DSA VISUALIZER | [GitHub](#)

- Developed an interactive DSA analysis and visualization system to demonstrate the working of algorithms and data structures through step-by-step execution.
- Implemented sorting, searching, and data structure algorithms with complexity analysis and visual representation to help users understand algorithm performance.

AI-BASED ATTENDANCE SYSTEM | [GitHub](#)

- Developed an automated attendance system using computer vision and face recognition to identify individuals and record attendance efficiently.
- Implemented facial image processing and recognition techniques to automate attendance tracking and reduce manual effort.

FACE RECOGNITION SYSTEM USING PCA & ANN | [GitHub](#)

- Developed a face recognition system using Principal Component Analysis (PCA) for feature extraction and Artificial Neural Networks (ANN) for classification.
- Implemented image preprocessing and facial feature recognition using OpenCV, TensorFlow, and Scikit-learn.

EDUCATION

Bachelor of Technology (B.Tech) | Sreyas Institute of Engineering and Technology | 2024 – 2028

Specialization: Computer Science – Artificial Intelligence and Machine Learning

Relevant Coursework: Data Structures, Machine Learning, DBMS

CERTIFICATIONS

- Cisco Networking Academy — Python Essentials 1
- Tata (Forage) — GenAI Powered Data Analytics Job Simulation
- Anthropic — Claude 101
- Intellipaat — Microsoft SQL Certification Training
- Cisco Networking Academy — Introduction to Modern AI
